While the strike was on last summer and fall it was Mr. Fahey's duty to visit each local organization of miners in the anthracite region and advise with them. Invariably, he advised against efforts that good order usually prevailed throughout the striking region. To a reporter for The Times he said, last night: "I feel the labor of the Strike Commission will not be in vain. The members of that body have worked untiringly and unceasingly, and every hard coal miner looks forward to the final settlement of one of the greatest strikes in history. HELEN KELLER PLEADS WITH BAY STATE LEGISLATORS

Helpless State of Deaf, Dumb, and Blind.

BOSTON, March 7.—Helen Keller, the wonderful Radcliffe girl who possesses the single sense of touch, was the most interesting figure today at the Statehouse, when she appeared before a legislative committee to advocate a bill for the appointment of a commission to investigate the condition of the adult blind of the State.

Her appeal was a most pathetic one. Her teacher, Miss Sullivan, stood beside her and interpreted the few words Miss Keller could not articulate plainly. Though deaf, dumb, and blind, Helen Keller has learned to speak mechanically, and nearly every word she spoke was plainly understood.

"It is terrible to be blind and to be uneducated," she said, "but it is worse for the blind who have finished their education to be idle. Their very education grows a burden, because they cannot use it. All the knowledge they have gained in their school days can bring no happiness into their lives. Indeed, I have sometimes thought that their condition before they go to school is happier than that state of educated helplessness in which the school leaves them. They think, think, think, in the long days that are nights."

"They have been taught to aspire; they have read books; perhaps they have tasted the 'higher education,' and now they are sent back from school often to poor homes, with nothing to do except to contrast, with bitter longing, the school days, full of books and music, with the helpless, inactive present. The education was a delight and a privilege, but for what have they been educated? 'I remember the distress of many blind people I have known who, after finishing their education, could find no means of supporting themselves, because no one helped them to find positions in which they could turn what they have been taught to practical use. The greater their ambition to do useful work, the more cruel their disappointment. I often receive letters from them, and the cry of their despair is in my heart as I speak."

"If this Commonwealth will establish a commission to place the blind in positions of self-support, it will be doing three things—helping the blind, relieving itself of the burden of caring for them, and setting an example to other States. Already Massachusetts has played too long in a work in which she should lead. It is not higher education that the blind need. It is not Greek and Latin, but an industrial training and some one with influence and authority to help them to a place in the industrial world."

According to the last State census there are 3,983 blind persons in Massachusetts, of whom only 576 are under twenty-one.

Edward MacDowell, conspicuous in the ranks of American composers, appeared yesterday afternoon at the Columbia Theater in a piano recital. Mr. MacDowell's name is now familiar to every student of music and the desire to hear the composer's own conception of his works brought out a good sized audience which applauded enthusiastically and in characteristic Washington fashion. The audience was made up largely of young people, many of them students at local seminaries.

The numbers accorded the most generous applause were the several compositions by Mr. MacDowell included in every young pianist's repertoire. In "A Wild Rose," "To a Water Lily" and "A Scotch Poem" the composer delighted his hearers. But while his conception of these and other works given birth in his own brain proved original and interesting, Mr. MacDowell's ability as a pianist and his reading of other composers were disappointing. In the past months the Washington public has listened to Padewski, to Gabilowitch and Hambourg, and it is inevitable that lesser lights should suffer by comparison.
